

Phlebotomy Training Course

Certificated

To National Association of Phlebotomy Standards

This excellent phlebotomist training course is suitable for nurses, HCA's, midwives, district nurses and other health care professionals looking to train in phlebotomy or to obtain UK Certification.

The course will be held at Fordingbridge Surgery over the duration of one and a half days which will give the underpinning knowledge required, covering such issues as professional responsibility, anatomy and physiology, location of veins and one to one practical session, date of which is arranged at the theory day.

Assessment and certification will take place in the candidates work environment or at Fordingbridge Surgery, after completion of log book, by the Phlebotomist Consultant Trainer.

Day One

- ❖ Health and Safety
- ❖ Anatomy and Physiology
- ❖ Troubleshooting
- ❖ Practical Technique Phlebotomy (inc use of winged infusion kits)

Day Two (date to be arranged with candidate on theory day)

- ❖ Practical clinic phlebotomy with Consultant Trainer

Assessment and Certification

- ❖ Completion of log book
- ❖ Formal Assessment at Fordingbridge Surgery or candidates workplace
